Print Scale Bars

## Single Images
Image Processor

It's Here!

Easily add a scale bar to your image. It's simple, customizable, and looks great!

Show the bar, save the image, and it burns right in!

Colorized Measurements
Color by Measure | Local Measure

Batches of Images
Processed Image Editor

And...

Edit > Burn Scale Bar

Add scale bar printing as a step in a "Make Ready to Publish" Recipe!

Better for Reports

New "Formatting" panel lets you customize the X and Y limits of your histograms.

Find it in *Color By Measure*, *Local Measure*, and *Histogram of Measurements*.

X Limits:	0	-	0.8
Y Limits:	0	-	35
Font Size:	10		

| 0.043 | 16 | ✏️ | 🔗 | ⬆️ E |
| 0.64 | Bins | Formatting | Coloring | |

Lock in consistent limits for better comparisons between images.

Bug Fixes and Other Changes

- Dramatically improved font scaling on histogram and colorbar axes

- New dark settings panels in preview windows

- All global measurement windows will now appear offset to the left of the Current Image

- Fixed bug which affected batch nearest-neighbor measurements of blank images

- Fixed bug which affected batch saving overlays on 16-bit grayscale images

- Over 10 other fixes and enhancements
