Lock in Simple Recipe

Guarantee consistent operation in production environment

Comply with QC audit requirements

Share Recipes, but protect underlying IP if needed

Bug Fixes and Other Changes

- Over 50 fixes and improvements
- New Non-Local Means may produce slightly different results than previous function. It is

recommended that you re-test Recipes which use it.

- Accelerated image display across all apps
- Accelerated Simple Mode switching
- Color by Measure performance improved
- "Orientation" in Local Measure now only computes and displays in selection
- Histogram limits improved in all tools
- Removed confirmation message after saving Recipes
- New keyboard shortcuts in *3D Manual Edit*: **z** = Fill **x** = Erase **space** = Last Tool
- Easier activation: Fingerprints can now be taken directly from Activation Window
